

Air Borealis, formed in 2017 through a landmark partnership between the Innu and Inuit of Labrador and PAL Airlines, is a vital lifeline for the North Coast of Labrador. Our pilots fly scheduled passenger service, critical medevac, surveillance missions, float planes operations, ground and water surveying.

Air Borealis pilots operate the iconic Twin Otter across some of the most remote and stunning regions of the North Atlantic coast, gaining true hands-on experience in demanding Short Takeoff and Landing (STOL) environments. Their work supports communities, strengthens regional mobility, and showcases the unique skill set required to fly in the North.

About the Operator

- **Headquarters:** Happy Valley–Goose Bay, NL
- **Pilot Base:** Happy Valley–Goose Bay, NL
- **Services:** Scheduled Passenger Service, Cargo, Medevac, STOL Operations, Surveillance
- **Fleet Size:** 11
- **Aircraft Type:** DHC6 aircraft (wheels & floats)
- **Active Pilots:** 48
- **Average pilot flight hours per year:** 800 hours

Career Growth

- **Pilot-in-Command-Under-Supervision program providing opportunities in:**
 - Training Department
 - Flight Operations management
- **Meaningful hands on flying with frequent off strip/STOL work that builds skills and confidence quickly**

Lifestyle & Scheduling

- **Workload:** ~20 days per month
- **Scheduling:** Company built schedule based on pilot requests
- **Quality of Life:** Strong work/life balance in a supportive, community focused environment
- **Lifestyle:** Labrador offers year-round outdoor activities such as fishing, boating, and hiking in the summer, and snowmobiling, ice fishing, and winter activities in colder months. It's a great place for nature lovers looking for a quiet, scenic lifestyle and endless northern adventures. As a pilot, you will also play a vital role as the lifeline for communities with no access other than by air.
